Coding Projects:

RoomEASE - <https://github.com/maximusDecimalusMeridius/roomease>

- App to help facilitate peaceful cohabitation with roommates
- Developed for roommates that need another way to keep track of events, tasks and UOM's. Able to create and assign new tasks to individuals, get email reminders for events you are going to linked in your account, keep track of who owes who for dinners, drinks, and more. Only see the roommates associated to your house for a fun way to keep track of everything
- Defined SQL schema and databases, implemented routes for UOM's and Roommates rendered to page utilizing handlebars along with full CRUD functionality for UOM's and Roommates pages
- Voted Best Functionality and People's Choice by class and staff

Cinema and Sip - <https://github.com/Kawaikimono/Movies-n-Drinks>

- Web based app to help take one more choice off you plate for what to watch and drink tonight
- Made for people who know what genre they like but can't decide on a title. Also provides alcoholic and non-alcoholic drink options
- Responsible for random movie generation, researched dependencies and tools for project APIs and implementation. Additionally assumed project manager role ensuring MVP was met by project deadline, verified all backend links and functionality for front-end linking and functionality
